# DISCOVER EXCELLENCE WITH A FRENCH TOUCH

## Good Practice Visit in Rodez, France

### Reinventing Leadership: Good Practices That Empower The Organisation

Rodez Plant is the largest Bosch Factory in France for last generation diesel components: Common Rail Injectors, Nozzles, and Glow Plugs.

But there is more than meets the eye for **We at Rodez** have a passion for excellence that has been recognised both at a national level (Collaborative Innovation Trophy, recognition of excellence by the French President, the Senate, the Minister of Economy, Industry and Digital Affairs) and at international level (Laureate of the Industrial Excellence Award, Recognized as « Committed to Sustainability » by the EFQM, Double Prize Winner at the EFQM Excellence Award 2015).

Over the years, in spite of being a high cost location, we at Bosch Rodez have been able to reinvent ourselves and to continue to **drive excellence** through constantly empowering people, improving processes and delivering perfect quality.

On the February 22nd, we would like to invite you to **join us in Reinventing Leadership** during an **unconventional and innovating Good Practice Visit** that will include a Plant tour with role model practices shared by our experts and a World Café in the afternoon where we can connect and share knowledge and ideas.

A **World Café** is a process aimed at facilitating a constructive dialogue but also the sharing of knowledge and ideas. This process mimicks the atmosphere of a cafe in which participants debate a question or topic in groups before switching tables. A host will remain at the table to summarize the previous conversations to newcomers. As a result, many more ideas are added to the table which generates powerful outcomes, summarized in a debriefing sessions.

# 2

*Prizes for Bosch Rodez Plant at the EFQM Excellence Award 2015 in Sustaining Outstanding Results & Developing Organisational Capability.*
